

## ID50 USB Encryption Stick Password Manager

Article number: 775-2110-01

### Short product description

Portable Password Manager

### Product description

Are you facing password exhaustion? Concerned that your passwords are not strong enough and could be easily guessed or compromised? The ID50 Password Manager exists to make your life easier, by reducing the need to remember and enter passwords for your favorite and rarely used online services.

Connect the ID50 to your computer - Install the browser plug-in from our website – Enter your 4-6 digit PIN – and your ID50 is ready to go!

Both individual and business users will benefit from the ID50 Password Manager, because it is a cost-effective and easy to use multifactor authentication device, which significantly increases the security of their digital identities.
